

ORDER EXECUTION POLICY

GreatBless Global Markets Ltd.

INTERPRETATION

Terms defined in the Client Agreement have the same meaning in this Policy, whether or not capitalised, unless the context otherwise requires. References to "you" and "your" are to the Client. Where a definition in this Policy differs from the Client Agreement, the Client Agreement applies.

1. INTRODUCTION

1.1. This Order Execution Policy ("Policy") sets out the arrangements implemented by **GreatBless Global Markets Ltd.** ("Company", "we", "us") for the execution of client orders.

1.2. The Company uses reasonable efforts to obtain the best possible result for its clients when executing orders ("Best Execution"), taking into account price, costs, speed, likelihood of execution, and other relevant factors.

1.3. This Policy forms part of the Client Agreement and is a Company Policy under it. By using our services, you agree to be bound by this Policy. Where this Policy is inconsistent with the Client Agreement, the Client Agreement prevails.

2. SCOPE OF APPLICATION

2.1. This Policy applies to all Orders the Client submits in respect of any financial instrument the Company makes available, including contracts for difference (CFDs) on Forex, metals, energies, indices, and cryptocurrencies. The instruments available to the Account are displayed in the Client Portal.

2.2. The Company reserves full discretion to determine:

- Which instruments are available for trading
- The pricing source and methodology
- Execution conditions and trading parameters

2.3. The Company may act as counterparty (principal) to client transactions, or may transmit orders to external liquidity providers for execution, under the hybrid model described in section 6 and the Client Agreement.

3. ORDER TYPES

The Company supports the following order types:

3.1 Market Orders

- Executed at the best available price at the time of execution
- Subject to slippage (positive or negative)
- No guarantee of execution at the requested price

3.2 Pending Orders

- Buy Limit / Sell Limit
- Buy Stop / Sell Stop
- Buy Stop Limit / Sell Stop Limit

Pending orders are triggered when market prices reach the specified level and are then executed at the next available price.

3.3 Stop Loss & Take Profit

- Used to manage risk and lock in profit
- Not guaranteed and may be executed at worse prices in fast markets

4. BEST EXECUTION FACTORS

When executing orders, the Company considers:

- Price
- Costs (spreads, commissions, swaps)
- Speed of execution
- Likelihood of execution
- Likelihood of settlement
- Order size
- Market conditions and liquidity

The Company does not guarantee that the best possible price will always be achieved.

5. EXECUTION RISKS

Client acknowledges and accepts the following risks:

5.1 Slippage

Orders may be executed at a price different from the requested price.

5.2 Rejections

Orders may be rejected due to:

- Market volatility
- Lack of liquidity
- Abnormal market conditions
- Application of a risk-management control to the account, including Mandatory Daily Drawdown and Trader Guard rules as described in the Client Agreement
- Rejection of a modification or close instruction for a position protected by Auto-Lock Stop Loss and Take Profit, and automatic setting or execution of protective levels, as described in the Client Agreement

5.3 Market Gaps

Prices may change rapidly without intermediate levels.

5.4 Latency

Execution delays may occur due to:

- Internet connectivity
- Platform performance
- External system dependencies

6. EXECUTION VENUE

6.1. All client orders are received and processed through the Company's trading systems.

6.2. Transactions are conducted **over-the-counter (OTC)** and not on a regulated exchange.

6.3. The Company acts as the primary execution venue for client orders. However, the Company reserves the absolute right to transmit or route any client order to external third-party Liquidity Providers (LPs) for execution (Hybrid A-Book/B-Book model) at its sole discretion. The Company is not liable for execution delays or slippage caused by these third-party venues.

7. CLIENT INSTRUCTIONS

7.1. Where you give a specific instruction, the Company follows that instruction to the extent it is able to. A specific instruction may prevent the Company from taking the steps described in this Policy to obtain the best possible result, and to that extent the Company has satisfied its Best Execution obligation by following your instruction.

8. ORDER HANDLING

In the circumstances described in this Policy and the Client Agreement, the Company may:

- Accept or reject an order
- Cancel or amend a transaction
- Adjust an execution price in abnormal market conditions
- Close positions without prior notice where necessary
- Cancel, void, or amend trades resulting from Manifest Errors (for example obvious mispricing, off-market quotes, or delayed data feeds)
- Void an execution obtained through a trading practice prohibited under the Client Agreement

The Company will not void an execution or cancel a profit merely because a trade was profitable, was held for a short or long period, or resulted from a legitimate trading strategy.

9. TECHNOLOGY & SYSTEM FAILURE

The Company shall not be liable for:

- System or platform failures
- Data feed interruptions

- Communication breakdowns

In such cases, the Company may:

- Void trades
- Adjust prices
- Suspend trading temporarily

10. CONFLICT OF INTEREST

Client acknowledges that:

- The Company may act as counterparty to transactions
- A potential conflict of interest may exist

The Company implements internal procedures to manage such conflicts.

11. MONITORING & REVIEW

The Company reviews these execution arrangements at least annually, and whenever a material change occurs that affects its ability to obtain the best possible result for clients.

The Company does not publish execution quality statistics and does not undertake to review individual executions, except in response to a complaint raised under the Client Agreement.

12. CLIENT CONSENT

By opening an account and placing orders:

- Client accepts this Policy
- Client consents to OTC execution
- Client acknowledges execution risks

13. AMENDMENTS

The Company may modify this Policy at any time. Amendments take effect upon publication on the Company's website or platform. Continued use of services constitutes acceptance of the amended Policy.

14. LIMITATION OF LIABILITY FOR EXECUTION

14.1. The Client expressly acknowledges and agrees that all orders are executed under market conditions that may be volatile, illiquid, or subject to rapid price fluctuations.

14.2. The Company shall not be liable for any loss, cost, damage, or expense arising from:

- Any difference between the requested price and the executed price
- Slippage (positive or negative)
- Delays in execution

- Partial execution or failure to execute
- Requotes or rejected orders

14.3. Under no circumstances shall the Company be liable for any deviation between the expected price and the executed price, regardless of the cause, including but not limited to:

- Market volatility
- Liquidity constraints
- Technical failures
- System delays
- Third-party provider issues

14.4. The Client acknowledges that:

- Execution prices are indicative and not guaranteed.

14.5. An execution outcome is binding once executed. This does not remove your right to raise a complaint through the procedure set out in the Client Agreement, including where you believe an execution did not comply with this Policy.

15. FINAL PROVISIONS

Nothing in this Policy excludes or limits any liability of the Company, or any right of the Client, that cannot lawfully be excluded or limited.
